

# Sunvic Controls Ltd

## Environmental Policy

1. Sunvic Controls Limited regards the promotion of environmental conservation as an objective of all employees at all levels.

It is the company policy to do all that is reasonable to protect and preserve the environment. The basis will be the integration of good management practices into site activities to comply with all applicable laws and regulations, utilisation of the best available technology where economically viable and continually improving environmental performance.

2. In particular the company will:-

- Actively seek ways to reduce energy consumption, air emissions and discharges to water.
- Seek to eliminate or minimise waste at source, make efficient use of resources and recycle or reuse materials. Ensure that any waste is transported and disposed of with due regard to the environmental considerations and current legislation.
- Market sources that are safe to use and which can be reused, recycled or disposed off safely.
- Within the immediate area, control to the lowest practical level - noise, odour, atmospheric emissions, traffic and the aspects of the company's activities, that may affect the local community.
- Continuously review and improve procedures to minimise the potential risks to the environment.
- Regularly audit activities and monitor environmental performance to demonstrate compliance with this policy.

The Manufacturing Manager will be responsible to the Managing Director for the implementation of this policy.
